App / platform	www.eddhub.app
Support / complaints	support@eddhub.co.uk
Privacy contact	privacy@eddhub.co.uk
Billing contact	billing@eddhub.co.uk
Classification	PUBLIC

This document is prepared for publication/use with the EDD Hub website and app. It is written for the current MVP operating model and should be reviewed if the product, payments, jurisdictions, data processing, or delivery model changes.

1. Purpose

This policy explains how slip photos and customer/order data must be handled in EDD Hub.

It applies to takeaways, drivers and admin users.

2. Core rule

Slip photos are used to help the accepted driver identify, collect and complete the correct delivery.

A slip photo must not be treated as general data storage, marketing material, customer profiling data or a public document.

3. Takeaway responsibilities

When creating a request, the takeaway is responsible for:

- uploading the correct slip
- making sure the photo is clear and readable
- making sure the slip relates to the correct order/drop
- making sure the slip contains only information needed for delivery
- checking that any AI/scanned or uploaded data is correct before sending
- confirming that the slip is correct and readable

4. Slip photo requirement

For MVP, a request cannot be sent without a slip photo where the app requires one.

No photo means no request, unless EDD Hub changes this rule in the app.

5. Customer/order data on slips

Slip photos may contain:

- customer name
- customer phone number
- delivery address or partial address
- postcode
- destination area
- order reference
- delivery notes
- order details
- handwritten or printed instructions

Takeaways should avoid uploading information that is not needed for the delivery.

6. Visibility before driver acceptance

Drivers must not see slip photos before accepting a job.

Before acceptance, drivers may see limited job information, such as:

- takeaway name
- pickup address
- city
- destination area
- postcode
- order reference
- driver payment
- ready status
- expiry countdown

7. Visibility after driver acceptance

After a driver accepts a job, the slip photo may be shown in the active job or collection flow so the driver can match the correct order or bag.

The driver must use the slip photo only for the assigned delivery.

8. Driver rules

Drivers must not:

- copy slip photos
- save slip photos outside the app
- share slip photos
- post slip photos online
- use customer information for unrelated reasons
- contact customers for unrelated reasons
- keep customer information after delivery

Drivers must treat slip photos and order information as confidential.

9. Admin rules

Admin users may access slip photos only where needed for:

- support
- dispute review
- safety investigation
- operational troubleshooting
- platform integrity
- legal/accounting reasons where relevant

Admin users must not download, share, forward, screenshot or expose slip photos unless strictly necessary and authorised.

10. Storage and retention

Slip photos are stored with job records, such as job ID, takeaway ID, drop ID and timestamp.

Uploaded slip photos are normally deleted after 30 days unless attached to a dispute, issue report, safety concern, payment issue or investigation.

If attached to a dispute or investigation, a slip photo may be kept for longer as part of the relevant record.

11. Wrong or unclear slips

If a slip photo is wrong, unclear or unreadable, the takeaway may need to cancel and resend the request.

Once a driver accepts, key request details and slip photos should not be edited. If something is wrong, the takeaway must cancel and resend where the app allows it.

12. Breach of this policy

Misuse of slip photos or customer data may lead to warning, restriction, suspension, removal, legal action or reporting to relevant authorities where appropriate.

13. Contacts

Report slip photo or customer data issues to support@eddhub.co.uk.

Report privacy concerns to privacy@eddhub.co.uk.
